## Professional Summary

Software developer with an educational background in computer science and a hands-on full-stack bootcamp. Quick learner, can create full-stack applications, and always aims to exceed expectations. Fueled by an unwavering love for problem-solving, a passion for excellence, and a relentless pursuit of improvement to every project.

---

## Skills

|                 |            |           |        |
|-----------------|------------|-----------|--------|
| JavaScript      | Python     | HTML      | CSS    |
| React.js        | Express.js | Node.js   | Django |
| jQuery          | Tailwind   | Bootstrap | JSON   |
| RESTful Routing | PostgreSQL | MongoDB   | GIT    |

---

## Projects

### *KIT*

Full-stack application that allows users to create and interact with posts on a home page.

- Utilized MongoDB, Express.js, React.js, and Node.js (MERN) to build a full-stack application in 1 week.
- Application contains full create, read, update, delete (CRUD) operations.
- Created application with a mobile-first approach and styled using Tailwind CSS.

### *Tempo*

Full-stack application that utilizes Spotify's API to display artists, top tracks, and allows users to play songs.

- Leveraged Python and Django to organize and display the visual aspects.
- Studied Spotify's API documentation thoroughly to implement the use of their web API, authorization process, and web playback SDK.
- Utilized Python for backend and implemented create, read, update, delete (CRUD) on a PostgreSQL database.

### *K-Dramas*

Full-stack application that displays K-Dramas with reviews and allows users to add K-Dramas to a watch list.

- Made RESTful calls to a MongoDB, Express.js, Node.js backend handling all create, read, update, delete (CRUD) operations.
  - Tested all backend routes during development using Postman.
  - Used Mongoose to define schemas for MongoDB collections.
- 

## Education

### *General Assembly*

08/2023 - 11/2023

Full-stack software engineering immersive student in an intensive, twelve-week, 450+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies. Developed a portfolio of individual and group projects.

### *New Mexico State University*

08/2014 - 05/2017

Completed 80 credits of Computer Science courses, including CS Principles, Object-Oriented Programming, Machine Programming, Calculus I & II, Compilers & Automata, Data Structures & Algorithms, and Software Development.

---

## Experience

### *Box Office - Flix Brewhouse*

08/2019 - 02/2020

- Greeted 50-300 clients as the first point of contact to the theater, displaying excellent customer service skills.
- Onboarded 4 new hires to box office roles as part of the talent development team, modeling best practices and answering questions.
- Sold hundreds of tickets using point of sale systems while making sure to follow the clients' seating requests.
